Discover. Learn. Empower.

## Experiment 6

**Student Name:** Vipul Kumar

**Branch:** BE-CSE

**Semester:** 6<sup>th</sup>

**Subject Name:** Advanced Programming - 2

**UID:** 22BCS10023

**Section/Group:** 637-B

**Date of Performance:** 27/2/25

**Subject Code:** 22CSH-351

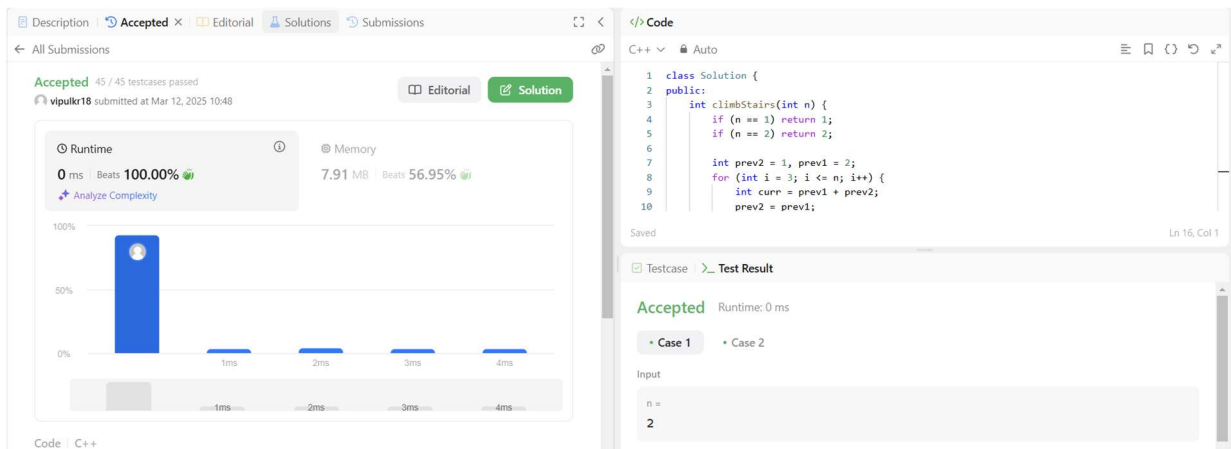

### Ques 1:

**Aim:** Climbing Stairs

### Code:

```
class Solution(object):
    def climbStairs(self, n):
        if n <= 2:
            return n
        a, b = 1, 2
        for _ in range(3, n + 1):
            a, b = b, a + b
        return b
```

## Ques 2:

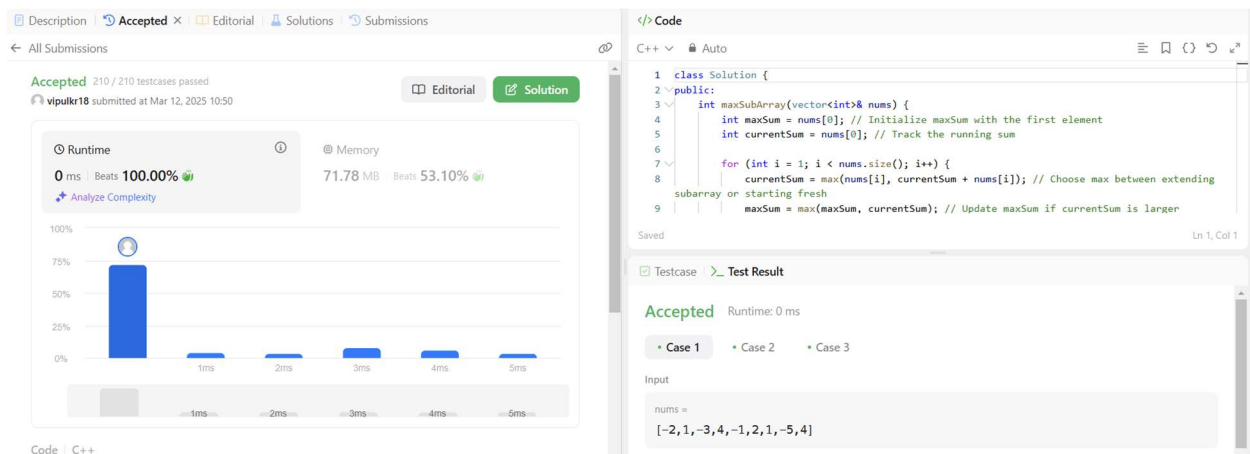

**Aim:** Maximum Subarray

## Code:

class Solution(object):

```
def maxSubArray(self, nums):  
    max_sum = cur_sum = nums[0]  
    for num in nums[1:]:  
        cur_sum = max(num, cur_sum + num)  
        max_sum = max(max_sum, cur_sum)  
    return max_sum
```

## Submission Screenshot:

## Ques 3:

**Aim:** Jump Game

## Code:

```
class Solution(object):
    def canJump(self, nums):
        max_reach = 0
        for i, num in enumerate(nums):
            if i > max_reach:
                return False # If we reach an index we cannot jump to
            max_reach = max(max_reach, i + num)
        if max_reach >= len(nums) - 1:
            return True # If we can reach the last index
        return False
```
